Firdaous Halim  
Mario Caña Varona

Intergovernmental  
Oceanographic  
Commission

# Stakeholders Picture

# Maritime Activity: Description

Function diversity (land and sea):

- Pollution control
- Maritime Salvage and Rescue (SAR)
- Fisheries inspection

Competences shared by national and regional authorities:

Internal waters: Coastal Guard (Gardacostas)

Rest of the maritime space: Maritime Safety and Security Society (Salvamento y Seguridad Maritima – Ministerio de Fomento)

# Stakeholders' Perspective about MSP

We observed:

- A general unawareness about the existence of an MSP initiative at the operational level
- The existence of adequate facilities and equipment for a variety of management actions at sea

# Suggestions to improve the link between the sector and MSP

## We identified:

- The need of informing and training on MSP at the downstream level
- The potential to use their technical means and expertise in the implementation of the MSP plans
- Their operations already imply management measures that may be continued and increased with the MSP plans to come

## Foreseen issues:

Coordination gaps between institutions/ administrative bodies once the plans enforced for an effective governance
