Stakeholders Picture

Maritime Activity: BIOTECHNOLOGY

ECIMAT (University of Vigo)

Technical support center for the University Research activities

Working for private companies as well

International projects on marine environmental issues

Affiliated with EU-wide Marine Biological Research Center (EMBRC)

(Aquaculture, microalgues, environmental quality of marine water, biota...)

CETMAR (Technical Support Center for Marine Technology)

Project development, strategic plans and marketing studies (MSP), technical assistance and contract services, marine technology)

Issues : meteorology, fishing, socio-economics, control and management of marine environment and resources, international cooperation

55 countries , 700 institutions and 450 projects

Stakeholders' Perspective about MSP

ECIMAT

Training for University students (practical training)

Stakeholders in MSP but do not implement / do MSP

Conduct projects related to MSP (reduction of CO², new sea habitats...)

CETMAR

- Facilitation of stakeholder involvement
- Knowledge on existent and potential use of the sea, projections
- Definition / implementation of indicators
- Development of tools for decision making
- Case studies
- Mechanism to monitor the process

Suggestions to improve the link between the sector and MSP

ASSETS

- Well connected with other countries – good position to share knowledges, experiences and skills

RECOMMENDATION

- Shall accept the arrival of new stakeholders and activities to the same place and manage the eventual conflicts

Group Picture

Thank You!
