

Applying an ecosystem-based approach for MSP: an EU guidance to accompany your journey

29 - 29 Sep 2021

Poll results

Table of contents

- In one word, what issues do you face when applying the ecosystem-based approach in MSP? (you can send multiple answers)
- What next steps will you take on the EBA journey?

What next steps will you take on the EBA journey? (1/4)

036

- Talk to RSCs to see what has been achieved and harmonize
- go and look at the existing trips of others
- dissemination to national stakeholders in Indonesia
- Applying
- Foster integration/articulation of EBA-MSP with other strategies (environmental, social or economic)
- Putting in several stages which Neighbouring and adjacent states can use to see how to tackle common areas e.g, in terms of fisheries etc
- disseminate information.
- Streamline key contact points
- Addressing cumulative impacts
- Look at what is already and effectively in place
- Identifying and integrating Green Marine Ecosystem
- Defining key issues to integrate EBA in MSP
- Standardise
- Understand better how to account for climate change in relation to an EBA to MSP
- biodiversity assessment
- Cumulative impact assessment

What next steps will you take on the EBA journey? (2/4)

0 3 6

- Centralize data and information per sea basin
- Land sea interaction
- Data gathering
- Ensure a common data base (including all the related studies) at least for each country maritime space but ideally for each marine region
- Cross borders coopération
- Seek to better align policy through MSP
- Quantify and map ecosystem services supply in EU waters
- Looking at priorities for blue economy per MS
- More research/studies
- Stakeholders involvement
- Land sea interaction
- Stakeholders participation
- Identify all stakeholders concerned by the MSP
- Adapt SEA procedure to evaluate MSP processes via the EBA principles
- Further the engagement process with Managers and Stakeholders and prepare to implement Science advice based on environmental variables
- set objectives with

What next steps will you take on the EBA journey?

(3/4)

0 3 6

- all the stakeholders
- Study and understand stakeholders's needs therefore have plan for using marine space effectively and sustainably
- Ensure environmental protection
- Inventorying resources, e.g., for management and enforcement
- Transboundary coordination
- Research and data finding/analysis to support knowledge On EBA in MSP area of Atlantic Canada
- Improve access to data
- Stock-taking, learning
- from others for next planning cycle
- Identify the priority ecosystem services provided by the site/country
- Quantify ecosystem services and map pelagic habitats
- As a scientist engage with the decisionmakers to here what they require
- Field Study
- Alignment of MSFD to MSP reporting
- Using experienced know- how
- Designating New MPAs

What next steps will you take on the EBA journey? (4/4)

036

- Transboundary coordination
- Data selection
- Implementing the adopted MSP
- Increase monitoring
- SEA
- Public Consultation
- Results
- Study the marine ecosystem
- Using recognized data to implement
